

# Club Centre

Every soccer club has a story to tell, yet so many struggle to relate that story over the internet.

Club Centre is here to help.

With Club Centre you no longer have to rely on your webmaster to keep your web site up to date.

Use the simple to use tools to quickly post photographs and news announcements about your club.

Your system administrator also decides who has read and write access to each section of the site. So for example you can create a section of the web site just for your board of directors so they can log in to view minutes, and report on action items.

Your members also demand good value for money and Club Centre provides this in a series of on line services.

## Registration and payment

Registering with a paper form and cheque is so passé. In today's busy schedules your members want on line registration and payment.

Club Centre allows you to create the registration forms you need for youth and adult players, and our simple checkout functionality allows them to pay quickly and securely with their credit card.

Your members will love this service but the big winner will be your club administrator. With on line registration and payment your administrator will no longer have to worry about bounced cheques or running to the bank to make a deposit. All registration data is tracked and stored securely on your club web site.

## Generate tax receipts

During tax season your members will be contacting you for a tax receipt. With Club Centre all requests are made and processed on line saving a huge amount of time for your administrators.

## Managing your house league

How much time do you spend managing your house league? What ever it is Club Centre will significantly shorten that work load while improving services to your house league members.

With Club Centre you no longer need a scheduler for your league as you can generate and publish schedules in just a few seconds. We guarantee that there won't be any double bookings of your fields.

If you need to track statistics then your convener only needs to log in and enter the scores on an on line form. As soon as the form is submitted the results and division standings are posted.

There is no longer any need to scribble out field maps. With Club Centre you can embed Google maps into your web site to show the location of each field.

Club Centre also communicates with our Ref Centre product which allows you to efficiently and reliably assign referees for your house league.

## Tournament management

If your club host a tournament then Club Centre can manage entries on line including credit card payment.

Tournament schedules, results and standings are easily generated and published by the tournament convener.

## Club event calendar

Each week there is something going on in your club so Club Centre allows you to publish details of these events with an easy to use event calendar.

## Try out postings

If you are recruiting players then Club Centre can help with an application that allows coaches to log into your site to post details of a team try out.

## Mailing lists

Email is such a convenient and cheap way of communicating with your members, but its no use if you don't have their email address.

Club Centre allows you to generate a series of mailing lists that allow your administrators, coaches or directors to communicate with your members with bulk emails.

## Service forms

Club Centre comes equipped with a series of service forms to offer you easy and reliable correspondence between the club and its members. For example if you need to recruit volunteers then you build and publish a volunteer service form that allows your members to volunteer on line for each open position. All correspondence is logged in the database for easy retrieval when needed.
